Full Stack Software Engineer looking to join a company where I can continue to grow my skillset. I'm currently working as a Developer in Residence (DiR) at DigitalCrafts where I support the lead instructor in teaching new developers. Prior to my career change, I worked as Life Event Specialist for Unum where I provided initial and ongoing training to new hires and trainees.

Software Development Skills

- JavaScript, CSS, HTML, Bootstrap, Python, React, Redux, Express, MongoDB, Mongoose, PostgreSQL, Sequelize, Postman, Postico, Google Firebase, Google Cloud, Node.js, jQuery, Git

Education

DigitalCrafts | Certificate in Software Engineering | Atlanta, GA

January 2021

- 16-week Software Engineering development program covering full-stack development with an emphasis on cutting-edge frameworks such as React/Redux, Node.js, Express and PostgreSQL

Dalton State College | B.A.S in Technology Management | Dalton, GA

May 2018

Software Development Portfolio

GachaSphere | GachaSphere.surge.sh | Github.com/brodri4/Gachasphere-client

- Member of a 4-person development team building a user generated global ranking list for all top anime mobile games and provide users with the ability to share user customized ranking lists and stay connected with the games online community via Reddit and Twitter
- Built using JavaScript, React.js, Node.js, Express, PostgreSQL, Sequelize, Axios, JSONWebToken and bcrypt

SingleList | Single-List-42.surge.sh | Github.com/Jonathan-Nuno/SingleList

- Created a todo list application with the ability to manage a shared list between a single or multiple users utilizing the MERN stack, Redux for state management and authentication logic
- Built using JavaScript, React.js, Node.js, Express, MongoDB, Mongoose, Axios, JSONWebToken and Bootstrap

Plannero | Plannero.herokuapp.com | Github.com/Jonathan-Nuno/Plannero

- Member of a 3-person development team building a project tracking webpage which allows multiple users to create, delete and update their own individual projects within their own user profile
- Built using JavaScript, Node.js, Express, CSS, PostgreSQL, Sequelize, Bootstrap

Knitworthy | Knitworthy.net | Github.com/abbeyperini/Knitworthy

- Member of a 4-person development team building a knitting/crochet/fiber arts webpage which converts the amount of time and materials used into a fun fact
- Built using JavaScript, HTML, CSS, Bootstrap

Professional Work Experience

DigitalCrafts | **Developer in Residence(DiR)** | Atlanta, GA

January 2021 - Current

- Support the lead instructor in teaching new developers through lessons and providing instruction on a variety of languages, tools and frameworks.
- Effectively communicate technical concepts in ways that new developers can comprehend.
- Provide support and ensure each and every student understands the daily lessons, lectures, and assignments while continuously building on my skills gained at DigitalCrafts.
- Assist students on an individual and small group basis to reinforce learning concepts, help complete assignments and improve performance.
- Provide tutoring to students in need of extra attention with coordination from instructors and students and upper level management.

Unum | **Life Event Specialist** | Chattanooga, TN

May 2018 - August 2020

- Created and implemented a Microsoft Excel macro to assign work coverage items to individuals on the team and effectively reduced work coverage distribution time by at least 50%
- Decreased claim turnaround times and reduced company spend on document and phone call translations by going above and beyond through real-time and as-needed Spanish-to-English translations
- Collaborated on modifying the eligibility review process regarding complex scenarios in which further action was required prior to confirming eligibility, resulting in a shortened initial claim review
- Mentored Short-Term Disability Trainees by aiding with claim list prioritization and direction for both behavioral and non-behavioral claims
